

**WE ARE LOOKING FOR YOU...**

## Quality Assurance (QA) Engineer (m/w)

Jonny Fresh is a young and dynamic company that specializes into last mile delivery, with the current focus of dry cleaning and laundry to domestic and corporate customers. We are currently serving our customers in Berlin, Munich, Cologne, Hamburg, Frankfurt/Main, Hannover and Vienna. Given the leading position in the market and growth, we are looking to extend our development team to help us sustainably grow our in-house platform software solution.

### Your role

- You review business requirements, functional requirements and technical specifications of current software development projects
- You create, review, update and execute automation scripts as required for development, debugging efforts, and regression activity for regular releases
- You support the production deployment with testing and issue resolution - you structure bug reporting, bug tracking, bug classification & prioritization
- You collaborate with CTO to define quality process improvements, best practices, and leveraging metrics to ensure QA effectiveness
- You mentor the Web Development team members on testing and automation solutions
- You participate in product backlog grooming, story sizing activities while clarifying acceptance criteria
- You convert requirements and specifications into written test plans, test cases, and occasionally test scripts
- You define and execute test automation roadmap to reduce manual testing effort

### Your profile

- You have at least 2-4 years of experience in a similar role (QA analyst, QA engineer) on web applications (preferably e-commerce industry)
- You are experienced with automation testing frameworks (e.g. Selenium)
- You have knowledge in at least one object oriented programming or scripting language (e.g. PHP, Python, Java) is a plus
- You are experienced with testing highly scaling responsive websites
- You bring along knowledge of common browsers, operation systems, devices and their characteristics, limitations and compatibility
- You have a passion for writing detailed and thorough test cases
- You are a logic and solution driven thinking and work accurate, precise and sustainable manner
- You are fluent in English, German is a plus

## **Your opportunity**

- You are looking for your next career step into a role, where you lead and bring in your proven skills as an independent QA Engineer
- A high degree of creative freedom for you to develop your own knowledge – flat hierarchies and short decision-making channels, a great deal of freedom in your work
- You will benefit from a professional and highly motivated team – create value and have an impact to our great product and attractive consumer brand
- You will experience what it is to achieve ambitious goals and to celebrate those achievements as part of a team
- Your future starts now – the position is available immediately

## **Make an impact**
